

pba FOR LEED® CERTIFICATION

Our contribution to the efficiency and sustainability of buildings

LEED BD+C V4

What is LEED®

LEED® (Leadership in Energy Environmental Design) is a voluntary certification system for the management, design and construction of buildings that are sustainable from a social, environmental and economic point of view and in terms of the wellbeing of the users. Established in the United States in 1993 by the U.S. Green Building Council (USGBC), LEED is now the most widespread building sustainability certification standard in the world. It considers every field that involves the design and management of buildings or neighbourhoods, both commercial and residential new or undergoing requalification.

pba products contribute toward satisfying prerequisites and credits under LEED®.
